

ElevateEd: Nurturing Teaching Proficiency in Higher Education

24th to 28th June 2024

Introduction

The NEP 2020 strongly focuses on the growing need for knowledgeable and trained Faculty in building up any Academic Institute cannot be stressed enough. Unlike other graduate courses where Faculty has to take qualifying exams to be eligible for a teaching job, schools for professional courses mainly source Faculty from the pool of practicing professionals who may, or may not, have teaching experience. "What the Teacher is, is more important than what he teaches" (Karl.A. Menninger) Though imparting knowledge remains the core aspect, motivating students to become seekers of knowledge and helping them achieve their true potential assumes greater significance in creative disciplines. This Faculty Development Program aims to help higher education institutes to build up their most valuable resource, that is the Faculty, in areas beyond their core knowledge and training. It aims at developing an enthusiastic, cooperative, and positive attitude amongst Faculty, by giving inputs to enhance their teaching competencies. The Program is designed to help Faculty realize their potential, capabilities, and limitations and motivate them to upgrade. In addition, in a setup like a university, where hundreds of teachers are working, this a great opportunity to meet, know, and collaborate.

Highlights:

- Adult Learning Theories
- Creativity in teaching
- Personal effectiveness as a teacher
- Being an influential teacher
- Behavioural skills for teaching
- Developing a growth mindset
- Handling professional stress
- Improving relationships with co-workers.

Fees : Rs. 15,000
